1. Home

Tagline: Find your vantage.

Supporting line: Raising leaders, not just employees.

Hero headline: Prepare your child for everything the future can ask of them, not just a job.

Sub-headline: A comprehensive, academically validated assessment designed by corporate leadership and HR professionals. It reveals the leader, innovator and builder in every student, and maps what it takes to get there.

The problem (3 short points)

- Most students choose a path based on marks, peer pressure or family expectation.
- Most career tests are 10-minute quizzes that produce generic results.
- Very few guides understand what leadership, enterprise and innovation actually demand.

Why Alderwood Vantage (4 points)

1. **Depth, not a quick quiz.** A complete assessment across four dimensions.
2. **Academically validated.** Developed with PhD-qualified academicians.
3. **Leadership-led.** Designed by professionals who have spent careers hiring and developing leaders in leading MNCs.
4. **Beyond "what to study."** A 5-year roadmap to build skills, exposure and confidence.

For every path

Whether your child will build a venture, lead the family business, or grow a professional career, Alderwood Vantage helps them see where they stand and where they can go.

Credibility bar: DDI Master Facilitator | EPSHRM, IIM Calcutta |

Packages preview: Discover, Decode, Design (details in section 3A)

Closing call to action: Give your child a clearer view of their future.

2. How It Works

Heading: From uncertainty to a clear vantage in five steps

1. **Register.** Create the student's profile. Parental consent is taken up front, because we handle sensitive information with care.

2. **Take the assessment.** The student completes the four-module assessment online, at their own pace.
3. **Expert analysis.** Responses are scored using our validated framework and reviewed by renowned academicians
4. **Receive your Leadership Blueprint.** A clear, jargon-free report covering interests, personality, aptitude and leadership competencies, with pathway recommendations.
5. **Get guided.** Depending on your package, meet a trained counsellor and receive a personalised 5-year Leadership Roadmap.

A note on how we see students: Teenagers are still growing. Our results highlight emerging strengths and development areas, never fixed labels.

3. The 4 Modules

Heading: One assessment. Four lenses on potential.

Module 1: Spark (What Energises You)

Identifies the subjects, activities and fields that genuinely excite the student, so choices come from real interest and not from trends or pressure.

Module 2: Wiring (How You Naturally Operate)

Explores personality, temperament and working style: how the student thinks, reacts, decides and relates to others, and which environments bring out their best.

Module 3: Horsepower (What You're Naturally Good At)

Measures cognitive aptitude across reasoning, numerical, verbal and spatial abilities, showing natural strengths and learning potential.

Module 4: Edge (What You Can Build On)

Looks at the leadership and entrepreneurial competencies that set people apart: initiative, decision-making, influence, resilience, creativity, commercial thinking and learning agility.

Closing line: Together, the four lenses give a complete picture that no single test can.

The output: Your Leadership Blueprint

- **Leader's Lens:** how the student shows up today as a leader and innovator
- **Pathway Fit:** suitability across Build your own venture / Lead the family business / Professional career / Hybrid
- **Gap-to-Ready Meter:** where the student stands today against what each pathway demands

3A. Packages

Package	What's included
Discover	Assessment + Leadership Blueprint
Decode	Assessment + Blueprint + 2 one-on-one counselling sessions

Package	What's included
Design	Assessment + Blueprint + counselling + a 5-year Leadership Roadmap: skills to build, real-world projects, mentorship and yearly milestones

4. About Us

Our Story

We have spent our careers inside leading organisations, hiring, assessing and developing leaders. Again and again we saw the same thing: potential is often visible early, but rarely nurtured with intent. Bright young people drifted into choices by default, while others with real leadership and entrepreneurial promise were never shown what they could become. Alderwood Vantage was founded to change that, by giving students and families a clear, evidence-based view of potential, years before the stakes get high.

Our Vision

To be a partner in discovering and developing young leaders and innovators across the world.

Our Mission

- To replace guesswork with rigorous, evidence-based insight
- To help students become future-ready for any path: entrepreneur, family business leader or professional
- To make serious, credible guidance accessible to schools, institutions and families

Our Approach

- **Rigorous:** Assessment framework reviewed and validated by renowned academicians
- **Leadership-led:** Built by professionals experienced in leadership assessment and development
- **Personal:** Every report is explained in conversation, never just emailed
- **Honest:** We show potential and gaps with equal clarity

Our Values

Integrity | Student-first | Evidence over opinion | Confidentiality | Growth mindset

Privacy and Trust

Student data is collected only with parental consent, kept confidential, and never shared without permission.
